Teamworks (formerly Zelus Analytics) — Senior Manager, Product

2022 – Present

Previously: Staff Technical Product Manager, Senior TPM, TPM, Product Scientist

San Francisco, CA; Mexico City, MX

- Direct baseball's intelligence platform: front-office decision-making tools delivered through a 1+ billion record database, model customization APIs and a front-end application.
- Determine baseball's goals, maintaining a 6+ month roadmap and establishing quarterly key results for Product, Data Science and Engineering, balancing long-term research with operational needs.
- Lead the 3-person Product team, hiring candidates end to end (from job description to final decision), and setting the culture for a fully remote team through weekly one-on-ones and team planning.
- Grew the platform from MLB division exclusivity to 13 MLB clients plus 7 in NPB/NCAA, serving as the technical authority in MLB/NCAA sales cycles and rebuilding our onboarding playbook to cut time-to-value.
- Oversee the baseball research portfolio spanning projections, player evaluation, game strategy, player development and the draft, aligning Data Science, Product and clients on new priorities, validating platform changes over 40+ releases and authoring technical release notes.
- Connect front offices to Teamworks Intelligence through executive client relationships, running a user-research program that turns feedback into platform direction, leading new vendor negotiations, and delivering keynotes, moderating panels and recruiting at industry conferences.
- Designed and delivered decision-support applications for MLB/MiLB, NCAA and Draft with the newly acquired Telemetry Sports team, bringing player evaluation models directly to front-office stakeholders under hard baseball-calendar deadlines, now used by every MLB/NCAA partner throughout the season.
- Partner with Engineering on compute cost reduction, 10+ vendor integration and player mapping.
- Establish AI best practices in baseball and co-lead agentic information retrieval for client support.

Los Angeles Dodgers — Quantitative Analyst

2020 – 2021

Previously: Associate Quantitative Analyst

Los Angeles, CA

- Led R&D's collaboration with Pro Scouting, prioritizing the group's time to focus on relevant players and defending data-driven conclusions in department-wide scouting meetings, building trust in internal metrics.
- Partnered with Player Development to improve the analytic tools used across MiLB player plans.
- Built foundational probability models for catcher defense (framing, blocking, arm), value attribution metrics and a projection system; changepoint detection flagging talent shifts with confidence intervals.

EDUCATION

New York University — Center for Data Science

2018 – 2020

Master of Science in Data Science, 3.88/4 GPA

New York, NY

- Capstone project for the Brooklyn Nets: ensemble NBA shot prediction model using position-tracking data.

Universidad Nacional Autónoma de México (UNAM)

2013 – 2018

Bachelor of Science in Mathematics, 9.03/10 GPA

Mexico City, MX

- Assistant Professor for Probability I, Stochastic Processes I and Select Topics in Operations Research.

OTHER

Python, SQL, R and cloud data stack; LLM and agentic tools; Spanish (native speaker with translation experience).
